

/10

TEST : Fractions (2)

1) Reduce each fraction to lowest terms:

/2

$$\frac{35}{65} =$$

$$\frac{64}{40} =$$

2) Order this set of fractions from least to greatest: $\frac{17}{12}$; $\frac{3}{4}$; $\frac{13}{3}$; $\frac{-5}{7}$ (give details)

/2

3) Write each improper fraction as a mixed number :

/3

$$\frac{17}{12} =$$

$$\frac{36}{15} =$$

$$\frac{77}{13} =$$

4) Write each mixed number as an improper fraction :

/3

$$2 \frac{7}{20} \ggg$$

$$5 \frac{2}{3} \ggg$$

$$7 \frac{11}{12} \ggg$$
